Of the Eclipses this Year; 1675

Five times in this Annual Revolution, will the two Lumina-
ries suffer Eclipse, of which only tw \odot and those of the Moon
will be perceptible to us at *Kings Lyn*: and

The first of them will be upon New-years-day, the beginning
whereof will be at 36 *min.* after 5 at night: and at 32 *min.* af-
ter 7 (which is the middle time of the Eclipse) she will be to-
tally darkned, and at 26 *min.* after 9 at night, she will be fully
restored to her former splendor, so that from the beginning of this
Eclipse, to the end of the same; will contain in time 4 hours
wanting 10 *min.*

The second Eclipse of the Moon which will be to us visible,
will be upon the 27 of June in the Morning: The beginning
whereof will be at 39 *min.* after 1 in the morning, the middle
time of total darkness at 32 *min.* after 3. and the end there-
of at 26 *min.* after 5 in the morning, and this Eclipse from the
beginning to the end will be three hours and three quarters. The
end of the Eclipse cannot be seen of us because the Sun will Rise
before the Eclipse be ended.

A third Eclipse will be of the Sun, upon the 13 of June, a-
bout 6 in the Morning, not Visible to us.

A Fourth will be of the Sun upon the 6 of December, about
4 in the afternoon, not to us apparent.

A fifth Eclipse is of the Moon, upon the 12 of December, a-
bout 3 in the Morning, it will be a very small Eclipse, and (if a-
ny (as is questionable) it will hardly be perceptible.

A description of the four quarters of the Year.

Spring begins March 10 about 9. in the morning.

Summer begins June 11. about 12. at noon.

Autumn begins September 13. about 4. afternoon.

Winter begins Decemb. 11. about 10. before noon.

Rules concerning Husbandry.

When you would Plant or Graft, consider where the
wind bloweth, if it be in the South it is very good for
that purpose, but if it be North or East it is not good.

It is good to plant or graft generally the Moon encrea-
sing in these Signs, Taurus or Aquarius, in the beginning of
the Spring, or latter end of Harvest. Plant

Plant trees for continuance, when the Moon is in Taurus
Leo, or Aquarius.

Cut timber to have it sound in December or January, in
the wane of the Moon in Aquarius or Pisces.

Prune trees and pull off the moss in the month of Febr.

Plash hedges, and Lop trees for Fewel, that the heads may
the sooner grow again, when the Moon is in Aries or Libra,
and in her increase.

Set young Quicksets from September to March.

Remove young Trees in the last quarter of the Moon,
when she is in Aries, Libra, Scorpio; and in these Months,
September, November, February.

Set Vines in February, March or September, especially the
Moon in Aries, Libra, Scorpio, in her increase.

Set Rose trees in the midst of February, the Moon increasing.

Cut or prune trees in March or April, the Moon in Tau-
rus, Virgo or Capricorn.

Gather fruit, as Apples, Pears, and the like, at the full Moon
the afternoon, the weather being fair and dry.

Cut down Hay presently after the full of the Moon.

Dung ground to prevent growing of weeds, Moon decreasing

Sow Carrot-seeds about the end of February, or the be-
ginning of March, the Moon increasing. Also sow Onions, and
Leeks in February or March, at the wane of the Moon.

Sow Cucumbers and Melons in February or March, on
Iune, in a hot and fair day.

Sow Parsley, Fennel, and Anniseed, in February or March,
at the full of the Moon.

Sow Margerum, Violets, Time, Rosemary, and Lavender,
in February, March, or April, in the increase of the Moon.

Sow Gilliflowers and Wall-flowers in March or April, in
the old of the Moon.

Sow Hylop and Savory in March, when the Moon is old.

Sow double Marigolds in February or March, in the in-
crease of the Moon.

Shear Sheep at the increase of the Moon.

The best time to Geld cattel the Moon being in Aries,
Sagittarius or Capricorn,

Of Blood-letting, and some other Physical
Observations.

In youth let blood from the change to the first quarter, in middle-age, from the first quarter to the full. In elder years, from the full to the last quarter. In old age, from the last quarter to the change. But know, that under the age of 14, and above the age of 56, it is not good to bleed at all.

Again, in the Canicular or Dog-dates, it is very hurtful to take any Physick at all, unless there be great need; and indeed necessity hath no law: Wherefore in such a case, the disease being desperate, the cure must be adventured.

Take a purgation when the Moon is in Taurus, or Sextile aspect with Venus, decreasing in any of these three Signs, Cancer, Scorpio, or Pisces, and it will be sure to work the better, because when a moyst Planet, in a moyst Sign hath such an aspect, the humours in the body are then stirred up and down, and so the better purged out; wherefore in this case, it cannot be amiss to prepare humours by something that is laxative: and let this be done whilst the Moon is either in Gemini, Libra, or Aquarius.

Take a vomit that it may work thoroughly, when the Moon is in Aries, Taurus, or Capricorn: and know that the aspects of the Moon with Saturn, or Mars, or the Moon in Leo, ought to be eschewed in the taking of Medicines.

Finally, if necessity urge no haste, these observations are expedient: for it is a plain truth, that the change of weather upon differing aspects, both greatly change and alter mens bodies,
